Class Hours: Tu-Th 2:30 PM – 3:45 PM  
Professor: Dr. Douglas P. Looze  
Office: KEB 113F  
Phone: (413) 545-0973  
email: looze@ecs.umass.edu  
Office Hours: Tu 4:00 – 5:00PM; W 3:00 – 5:00PM  
Course Web Page: https://moodle.umass.edu/  
Syllabus is also at http://ece.umass.edu/ece/undergraduate/course-sites  
The moodle page contains all the course material to date, including this syllabus, the problem sets, and the lecture notes.  
Exams: There will be one (2 hour) exam given during the semester and a final exam given during exam week. The midterm exam will be 30% of the course grade. The final exam will be worth 40% of the course grade.  
HomeWork: There will be approximately 8 assignments which will be due at the beginning of the lecture on the specified date. Late homework will not be accepted – regardless of the excuse. Homework will constitute 30% of the grade.  
Objectives:  
1. Understand and be able to represent dynamic response.  
2. Understand the principles and objectives underlying feedback control, and how these affect the architecture of the control system.  
3. Understand and be able to apply analysis tools to determine control system performance.  
4. Design a feedback control system to achieve specified objectives.  

Table 1. Relationship of Course Objectives to ABET EC2000 Program Outcomes

<table>
<thead>

OUTLINE

1. System response Review FPE Chapters 1-3 (1)*
   a) Laplace Transforms
   b) Time Response
   c) Stability
   d) Frequency response

2. Control System Objectives FPE Chapter 4.1-4.2 (3)
   a) Potential for Control
   b) Performance
      i) Measures
      ii) System type

3. Classic PID Control FPE Chapter 4.3, 4.4.2 (4)
   a) Proportional, Integral and Differential Elements
   b) Effects on system response
   c) PID tuning rules

4. Frequency Response Analysis FPE Chapter 6.1-6.4 (6)
   a) Bode diagrams
   b) Nyquist diagrams
   c) Stability margins

5. Design of control systems FPE Chapter 6.6, 8.1-8.3 (12)
   a) Design objectives
   b) Compensation techniques
   c) Computer implementation

6. Exam (1)

* Approximate number of 75 min. lectures.
